INSTRUCTIONS TO OWNER-BUILDER

You have as of this date made application for a building permit as an owner-builder. You should be advised of the following provisions and requirements that apply to owner-builders:

PROOF OF OWNERSHIP – Prior to a building permit being issued to you, you must submit proof of ownership of the land concerned in the application in the form of a recorded deed, showing you own the property, or a copy of mortgage or warranty deed of the land, or a Miami-Dade County tax receipt statement to contain legal description of property and indicate property is in your name. Legal description and name on document of proof must correspond to the name and legal description on the application.

RESPONSIBILITY – You will be responsible for all work done by your day labor employees, and you must either employ licensed contractors or persons to be paid on an hourly or per diem basis. Any one contracting (including labor) with you, verbally or in writing, on a fixed fee basis for any work, who is not properly licensed, will be subject to a fine of \$500 and/or imprisonment for six months.

INSURANCE –Be advised that if your day labor employees cause any damage to persons or property, or if any of your day labor employees are injured on the job, you are liable. Your regular home insurance policy ordinarily DOES NOT cover this type of liability.

WITHHOLDING TAXES, etc. – You should be advised to investigate your responsibility for withholding Social Security, Federal and State Unemployment Insurance Taxes and Federal Income Taxes from the wages of employees working for you on the proposed construction, and for making returns thereof to the proper agencies.

DISCLOSURE STATEMENT – State and county law requires construction or demolition to be done by licensed contractors. You have applied for a permit under an exemption to those laws. The exemption allows you, as the owner of the property, to act as your own contractor even though you do not have a license. You must supervise the construction of demolition yourself. You may build, improve or demolish a one-family or two-family residence. You may also maintain, alter or repair your own single family or duplex residence; or erect a one story building or addition of not more than 500 square feet for commercial or industrial use, or perform maintenance or repairs and non-structural alterations, not to exceed \$5,000 on any building which you own or lease.

The building must be for your own use and occupancy. It may not be built for sale or lease. If you sell or lease more than one building you have built yourself within 2 years after the construction is complete, the law will presume that you built it for sale or lease, which is a violation of this exemption. You may not hire an unlicensed GENEP person as your contractor. Your construction or demolition must be done according to building codes and zoning Examinregulations of the firstyout state law and by county of municipablidensing ordinances.

John Ariton 11/14/2011 9:28:01 AM A MECH Approved SEE REVERSED SIDE FOR ADDITIONAL INFORMATION **DEMOLITION WORK** – In addition to meeting Florida Building Code requirements stated above, you are responsible for disconnecting all utilities, including water, sewer, septic tank, electrical service, gas, telephone, cable TV, etc., PRIOR TO COMMENCING DEMOLITION. You are also required to obtain a permit from the State of Florida Department of Health and Rehabilitative Services in order to abandon any septic tank that is on the property.

If you do not intend to do the work involved yourself, or with day labor, please list below, the name of the individual or firm with whom you have entered (or will enter) into a contract for the work.

NOTICE: SEPARATE PERMITS REQUIRED FOR ELECTRICAL, SEPTIC TANK ABANDONMENT, PLUMBING, ROOFING AND MECHANICAL WORK

I, the owner of property described as	
do hereby certify that I have read the foregoing instruct under my application for a building permit for construc	tions, and am aware of my responsibilities and liabilities ction work on the above described property.

Hot water syste (Types: electory Building)	t pump, elec. strip, nat. gas, LP-Gas, thermostat installed on HVAC s m: c., nat. gas, LP-gas, solar, heat rec., d	ed. heat pump, other are in compliance with	Review of plans and st	15a. Type 15b. EF:	ered by this calculation indicates compliance impleted, this building will be inspected for a	a with the Florid

MINIMUM REQUIREMENTS (See Note 1)

All Climate Zones

BUILDING COMPONENT	PERFORMANCE CRITERIA	INSTALLED VALUES:
	U-Factor = 0.65	U-Factor = 0.6
Windows (see Note 2):	SHGC = 0.35	SHGC = 0.3
	% of CFA < = 16%	% of CFA = /5.0
Exterior door type	Wood or insulated	Type: Insulated.
Walls - Ext. and Adj. (see Note 3):		1/2
Frame	R-13	R-Value = NA
Mass (see Note 3)		. 7 •
Interior of wall:	R-6	R-Value =
Exterior of wall:	R-4	R-Value = µ/A
Electric resistance heat (See Note 10)	Not allowed	N/A
Ceilings (see Notes 3 & 4)	R=30	R-Value = 30
Floors: Slab-on-grade	No requirement	R-Value = NA
Over unconditioned spaces (see Note 3)	R-13	R-Value = NA
Hot water systems (storage type)		.4/4
Electric (see Note 5):	40 gat: EF = 0.92	Gallons = N/A
	50 gal: EF = 0.90	EF= 1/0 /
Gas fired (see Note 6):	40 gal: EF = 0.59	Gallons = 40 (EXLSTING)
	50 gai: EF = 0.58	EF = 0.54 (0m0 1.1)
Air conditioning systems (see Note 7)	SEER = 13.0	SEER = /3 (\$45T)
Heat pump systems (see Note 8)	SEER = 13.0	SEER = A//A
	HSPF = 7.7	HSPF = 7/A
Gas furnaces	AFUE = 78%	AFUE = N/A
Oil furnaces	AFUE = 78%	AFUE = N/A
Programmable thermostat (see Note 10)	Must be installed on all HVAC systems.	Installed? Yes (No)
Ductwork: (see Note 9)		Location:
Unconditioned space*	R-6, TESTED	Unconditioned space
Conditioned space	NA	R-Value =
Unvented attic assembly per R806.4 with insulation at the roof plane	R-4.2	Test report: WA
		Conditioned space
		R-Value = N/A
		(No test report required)
Air Handler location:		end doned exert
Unconditioned attic* or garage	Requires test report	Location: Conditioned space
Conditioned space or		Test report:
Unvented attic assembly per R806.4 with insulation at the roof plane	No duct test required	N/A

(1) Each component present in the As-Built home must meet or exceed each of the applicable performance criteria in order to comply with this code using this method; otherwise Method A compliance must be used.

(2) Windows and doors qualifying as glazed fenestration areas must comply with both the maximum U-Factor and the maximum SHGC (Solar Heat Gain Coefficient) criteria and have a maximum total window area equal to or less than 16% of the conditioned floor area (CFA), otherwise Method A must be used for compliance. Exceptions: 1. Additions of 600 square feet (56 m²) or less may have maximum glass to CFA of 50 percent. 2. Renovations with new windows under ≥ 2 toot overhang whose lower edge does not extend further than 8 feet from the overhang may have tinted glazing or double-pane clear glazing. Replacement skylights installed in renovations shall be doublepaned or single paned with a diffuser.

(3) R-Values are for insulation material only as applied in accordance with manufacturers' installation instructions. For mass walls, the "interior of wall" requirement (R-6) must be met except if at least 50% of the R-4 insulation value required for the "exterior of wall" is installed exterior of, or integral to, the wall.

(4) Attic knee walls shall be insulated to same level as ceilings and shall have a positive means of maintaining insulation in place. Such means may include rigid insulation board or air barrier sheet materials adequately fastened to the attic sides of knee wall framing materials.

(5) For other electric storage volumes, minimum EF = 0.97 - (0.00132 * volume).

(6) For other natural gas storage volumes, minimum EF = 0.67 - (0.0019 * volume).

(7) For all conventional units with capacities greater than 30,000 Btu/hr. For Small-Duct, High-Velocity units, Space Constrained units, and units with capacities less than

(9) All ducts and air handlers shall be either located in conditioned space or tested by a Class 1 BERS rater to be "substantially" leak free. "Substantially leak free." shall mean distribution system air leakage to outdoors no greater than 3 cfm per 100 square feet of conditioned floor area at a pressure differential of 25 Pascal (0.10 in. wc.) across the entire air distribution system, including the manufacturer's air handler enclosure. Exception: New or replacement ducts installed onto an existing air distribution system as part of an addition or renovation. Such ducts shall either be insulated to R-6 or be installed in conditioned space.

10) The prohibition on electric resistance heat and the requirement for programmable thermostats do not apply to additions, renovations, and new heating systems installed in existing buildings.

TABLE 11B-2 MINIMUM	REQUIREMENTS FO	OR ALL PACKAGES	
COMPONENTS	SECTION	REQUIREMENTS	CHECK
Exterior Joints & Cracks	N1106.AB.1.2	To be caulked, gasketed, weather-stripped or otherwise sealed.	V
Exterior Windows & Doors	N1106.AB.1.1	Max .3 cfm/sq.ft. window area; .5 cfm/sq.ft. door area.	
Sole & Top Plates	N1106.AB.1.2.1	Sole plates and penetrations through top plates of exterior walls must be sealed.	
Recessed Lighting	N1106.AB.1.2.4	Type IC rated with no penetrations (two alternatives allowed).	4
Multistory Houses	N1106.AB.1.2.5	Air barrier on perimeter of floor cavity between floors.	NA
Exhaust Fans	N1106.AB.1.3	Exhaust fans vented to unconditioned space shall have dampers, except for combustion devices with integral exhaust ductwork.	~
Water Heaters	N1112.AB.3	Comply with efficiency requirements in Table N1112.AB.3. Switch or clearly marked circuit breaker electric or cutoff (gas) must be provided. External or built-in heat trap required for vertical pipe risers.	
Swimming Pools & Spas	ng Departr	Spits & heated pools must have covers (except solar heated). Noncommercial pools must have a pump timer. Gas spit a pool heaters must have minimum thermal efficiency of 78%. Heat pump pool heaters shall have a minimum COP of 4.0.	MA
Hot Water Pipes	34(1)(2.AB(5)(1)	Insulation is required for hot water circulating systems (including heat recovery units).	MA
Shower Heads	N1112.AB.2.4	Water flow must be restricted to no more than 2.5 gallons per minute at 80 psig.	MA
HVAC Duct Construction, Insulation & Installation	F N1110.AB	All ducts, fittings, mechanical equipment and plenum chambers shall be mechanically attached, sealed, insulated and installed in accordance with the criteria of Section N1110.AB. Ducts in attics must be insulated to a minimum of R-6.	V
HVAC Controls Ne Sta	N1107.AB.2	Separate readily accessible manual or automatic thermostat for each system.
